-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claim 4 is objected to because of the following informalities: Delete the extra period after image. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 11 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Otani (JP 08-185145), supplied by applicant (cited paragraph numbers are in reference to the machine translation of the Otani patent which has been included).

In reference to claims 1, 11 and 15, Otani discloses an image processing method comprising: discriminating between a still picture area and a motion picture area in an input image; enhancing edges with a quantity of edge enhancement larger in the motion picture area than in the still picture area; and outputting the input image having the enhanced edges, paragraphs 8-9.

In reference to claim 2, Otani discloses wherein the motion picture area is specified on the basis of an edge-moving area in the input image, paragraph 11.

### ***Allowable Subject Matter***

Claims 7-10 and 16-19 are allowed.

Claims 3-6 and 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or anticipate the claimed limitation of wherein the discriminating step is performed by a motion vector; wherein the quantity of edge enhancement for the input image that is judged as an imaged input image is set larger than the quantity of edge enhancement for the input image that is not judged as an imaged input image; dividing an input image into a plurality of areas and obtaining a motion velocity in each of the plurality of areas; and comparing the edge information with an edge information of the input picture delayed for one frame period to detect an edge-moving area. These limitations taken in conjunction with the other limitations make the above claims allowable over the prior art of record.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arthur A Smith whose telephone number is (571) 272 2129. The examiner can normally be reached on Monday - Thursday from 8:00 AM to 5:30 PM. The examiner can also be reached on alternate Fridays during the same hours.
